

ABS submersible sewage pumps AFP M8 and M9

ABS submersible sewage pumps, series AFP are suitable for clear and wastewater, for sewage with sludge containing solids and fibrous material.

Construction

- The water-tight fully flood-proof motor and the pump section form a compact and robust unit
- Water pressure sealed connection chamber, with two stage cable entry, protected against excessive cable tension and bending
- Water pressure sealed motor, insulation class H with bimetallic temperature monitors in the stator
- Rotor and rotor shaft dynamically balanced, upper and lower bearings lubricated-for-life, maintenance-free
- Blockage-free cooling system. Cooled by the medium
- Double shaft sealing
- Lower sealing by means of a silicon carbide mechanical seal, independent of the direction of rotation
- Upper mechanical seal carbon/chrome steel, independent of direction of rotation
- Oil chamber with seal monitor sensor to indicate water leakage through mechanical seal
- Hydraulic parts with open or closed 3-channel or 5-channel impeller
- These pumps are available both in standard and explosion-proof versions in accordance with international standards e.g. Ex d IIB T4/ATEX II 2Gk

Motor

Water pressure sealed high efficiency motors, (3-phase, squirrel cage induction motors), from 110 to 650 kW and, depending on hydraulic requirements as 4- to 12-pole versions

Voltage: 400 V3~, 50 Hz (other voltages on request)

Insulation class: H (motor winding protected by temperature sensor 140 °C)

Protection type: IP68

Start-up: direct on line (DOL), soft starter or star-delta

50 Hz

Hydraulics

You have the choice of the following hydraulics in the range of DN 400 to DN 800 discharge:

Hydraulics / Impeller type

AFP 4003	3-channel, closed
AFP 5002	3-channel, closed
AFP 6003	3-channel, open
AFP 6004	3-channel, closed
AFP 8001	5-channel, open
